SUMMARY

Full-Stack Developer with over **3 years of experience** in building **dynamic, responsive web applications** using **Angular** and **.NET** technologies. Proven ability to design, develop, and deliver **high-quality, scalable, user-centric applications** with a strong focus on **performance optimization**. Experienced with **microservices architecture**, including **Kafka** and **gRPC** for inter-service communication. Proficient in **.NET Dapper**, **Entity Framework**, and **Angular Micro frontend Services**, with a track record of integrating modular components for complex applications. Solid understanding of **QuickBooks** for **financial integration** and **accounting** services, And front-end frameworks to drive seamless user experiences in large-scale web systems.

SKILLS

Frontend Technologies: HTML5, Scss, TypeScript, Angular

Backend Technologies & Frameworks: .NET (C#, Dapper, Entity Framework), Kafka, gRPC, QuickBooks API Integration

Payment : Stripe Integration

Styling & UI Frameworks: Bootstrap, Material-UI, Sass, Styled Components

Databases: PostgreSQL (PgSQL)

Version Control & Build Tools: Git, NPM

Content Management Systems (CMS): WordPress

Development Practices & Methodologies: Responsive Web Design, Agile (Scrum) Development

EXPERIENCE

ID Softsource India Pvt Ltd

Software Developer

Coimbatore, TamilNadu Junior

July2023 - present Frontend

Development:

- Built responsive, user-friendly interfaces using **Angular, HTML5, CSS3, and TypeScript**, leading to a **50% increase in user engagement**.
- Developed and integrated **RESTful APIs** to enhance frontend scalability and performance.
- Ensured cross-browser compatibility and implemented performance improvements across multiple client-facing applications.
- Collaborated with UI/UX designers and backend teams to deliver **mobile-optimized, high-performing** applications in **Agile/Scrum** environments.
- Have **3 years of hands-on experience in Angular**, including work on **Micro frontend architecture**.

Backend Development:

- Developed backend services using **.NET (C#)** with **Entity Framework** and **Dapper**, ensuring efficient data access and high application performance.
- Implemented **gRPC** for high-performance, low-latency communication between microservices.
- Integrated **Kafka** for event-driven microservices, improving system scalability and decoupling.
- Built modules that interact with **QuickBooks APIs** for financial and accounting operations.
- Integrated payment processing using **Stripe APIs**, including payment intent creation, payment confirmation, refunds, and webhook handling for secure transaction management.
- Designed and implemented **secure payment workflows with Stripe**, ensuring PCI-compliant payment processing and reliable transaction tracking.
- Successfully handled multiple backend modules **independently**, demonstrating strong problem-solving and system design capabilities.
- Have **2.2 years of backend development experience**, contributing to several core modules in a **microservices-based architecture**.

PROJECT EXPERIENCE

Home Inspection Platforms (InspectorMatch - app.bootg.com)

July 2023 - Present

A web-based platform enabling seamless scheduling, inspection, reporting, and billing for home inspection services.

- Contributed to both **frontend UI** and **backend service layers**, aligning features with business and technical requirements.
- Played a key role in delivering modular features using **Angular Microfrontend architecture** and **.NET-based microservices**.
- Integrated third-party services including **QuickBooks, Kafka, and gRPC** for real-time communication and financial workflows.
- Collaborated in an Agile environment with designers, QA, and backend developers to ensure high-quality, timely releases. Designed and developed multiple **company-focused static and dynamic websites**, ensuring **pixel-perfect UI**, fast load times, **responsive design**, and **cross-browser compatibility**.
